## PRODUCTION SITES

Our breweries are modern production sites with an annual overall capacity of 11 million hectolitres of beer.

### FRANKFURT/ODER

With the acquisition of the group's first brewery, extensive investment in modernisation took place as early as 2003. Today, Frankfurter Brauhaus has three PET lines, one bottling line for reusable bottles and one for kegs. We are therefore able to produce an overall volume of up to 3 million hectolitres. Whether Pilsner, export, wheat beer, Radler or premium festival beer, Frankfurt produces multi-award winning types of beer.

### CHAMPIGNEULLES

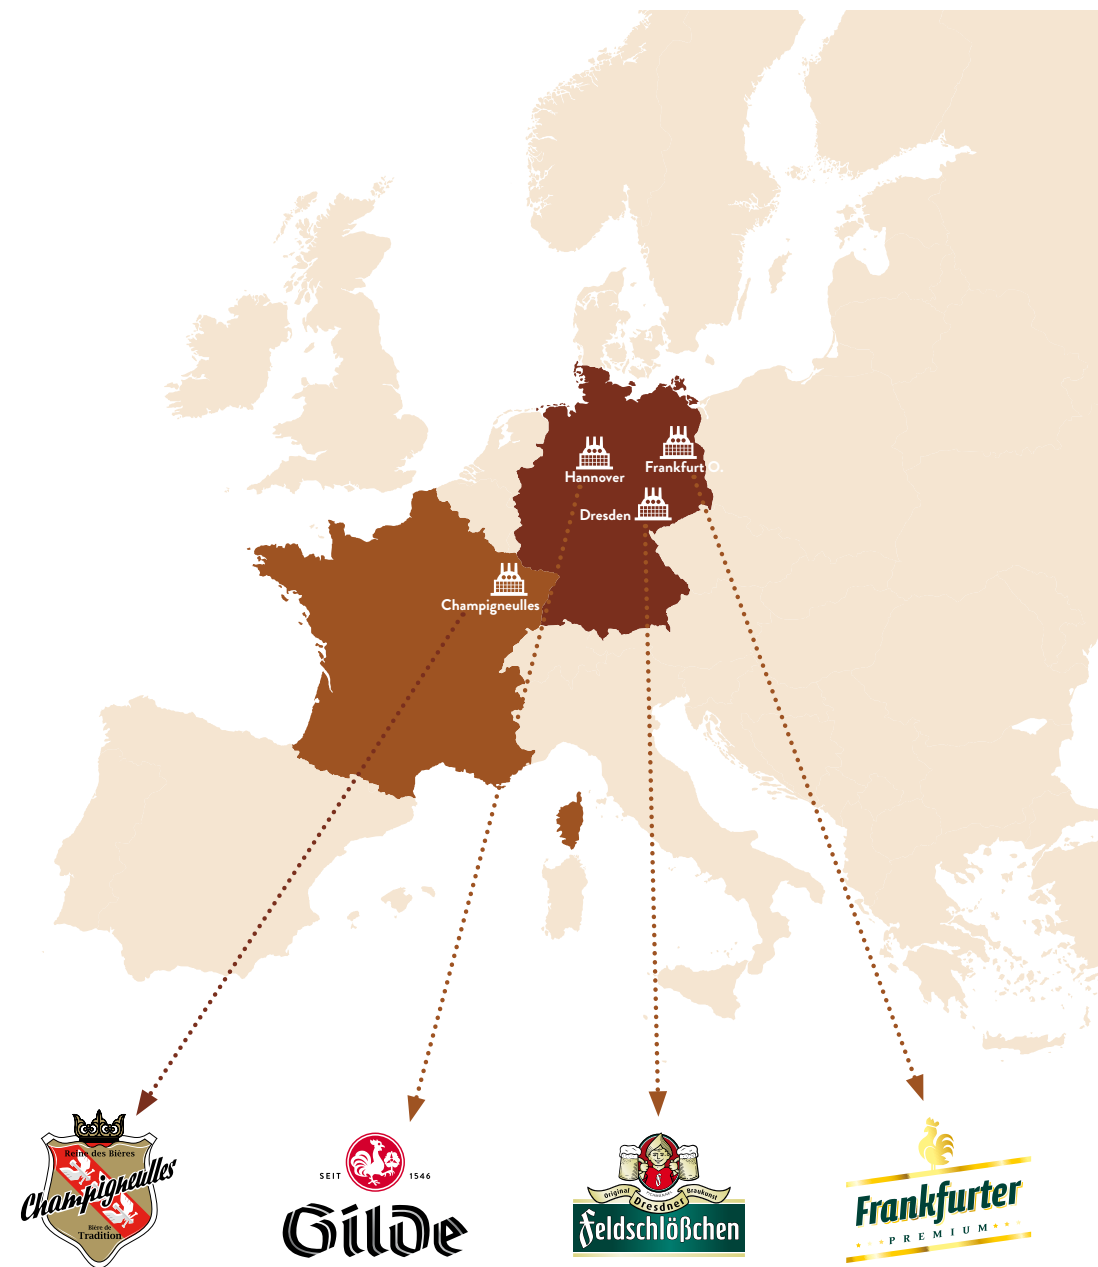

Champigneulles is the oldest active brewery in France. Since 1897, this name has been a synonym for quality. Today, in addition to its own brand, numerous beer specialities are brewed at this site, which are sold to supermarket chains and well-known retail brands in all of Europe. In total, this site can produce more than 4 million hectolitres of beer.

### DRESDEN

Part of the TCB Group since 2011, the Feldschlößchen Brewery has a long brewing tradition. Top-class quality beers such as Pilsner, Hefeweizen, Export, Alkoholfrei, Urbock, Radler and Schwarzbier are from Dresden. The site can produce more than 2 million hectolitres of beer, in glass bottles, cans and kegs.

### HANNOVER

Gilde Brewery from Hanover has been part of the brewery group since 2015, and is of great importance, with a capacity of more than 2 million hectolitres. This traditional large brewery is the oldest business in Hanover. Its range is multi-faceted. The types of beer produced include Premium Pils, Pilsener, Radler, wheat beer, non-alcoholic and special beers. We fill bottles, cans and kegs.

## FELDSCHLÖßCHEN A SPECIAL PREMIUM

This varied range covers beer varieties from classically aromatic, via refreshingly light to tangy, accented with hops. Pilsner, Export, Alkoholfrei, naturally cloudy Radler and regularly changing limited edition beers characterise an extensive product variety. Feldschlößchen Urbock is also part of the Premium Group. In 2013, it was awarded Best European Bock Beer at the World Beer Awards.

[Produkte Feldschlößchen](#)

## CHAMPIGNEULLES TRADITIONALLY STRONG

The purest spring water and carefully selected ingredients characterise the flavour of Champigneulles - a special beer brewed according to a traditional French recipe. Absolutely pure, with a high percentage of alcohol, it will win you over with its golden colour and harmonious and flowery aroma; also available as a monastery beer.

[Produkte Champigneulles](#)

## ASKANIA UNIQUELY LIGHT

Askania is a very light lager, very easily digestible, thanks to its low percentage of alcohol of just 4.5%. A slight carbon dioxide content and reduced original gravity underline its character. Askania is available in glass bottles, cans, PET bottles and kegs. In addition, we are offering a flavourful non-alcoholic malt drink of this brand.
